Constructive comments regarding instructors teaching style and approach

N/A, one of the best professor I have had here at Tulane and his teaching still is one of the best I have had!

Great instructor. At times the class gets a bit cookie-cutter given that it's an intro class. Maybe spend a bit more time "teasing" the students about what more is to come, so that people can get more excited about taking their next class in Finance.

None

He prepared us for our tests extremely well. Unlike other teachers, where the preparation is not as extensive.

I think that a little more could be done to even out the pods and to facilitate engagement in them. Just to create a little more collaboration and rapport would be fun and engaging. Professor Sandvik is incredibly kind and engaging and you can tell he cares a lot about his students and his class. He makes a 9am finance class worth attending and brings the material to life. I really like when there are anecdotes in the lectures and when we do practice problems and then walk through them together. He is a great professor, one of my favorites!

I occasionally felt that the material was moving very quickly, but oftentimes the subject matter was followed up on and reviewed extensively. The reviews were extremely helpful and I have never experienced this much time taken to review in a class. It definitely allowed me to feel far more prepared for exams and feel that I genuinely understood what was happening rather than hoping to memorize enough to do well. The professor also took time to answer any questions which does not always happen. Finally, Professor Sandvik took very complicated course material and made it accessible and enjoyable to learn. I was dreading taking this course after hearing terrible things from friends who had taken it in the past, but Professor Sandvik made it not only bearable but enjoyable and I feel knowledgeable on the subject and feel that I have an extremely strong base for my future. Thank you!!

great professor. his slides and review packets make the class very easy to follow and this professor makes us feel like he wants us to learn the material.

I am so happy I took him as a teacher, he presented the material in such an effective way and I felt like I gained a great understanding of finance.

Professor Sandvik is a great teacher and I don't have any criticism for his teaching style. He makes sure everyone understands what he's teaching before moving on and clearly explains topics and material. I'm glad I could have him as my teacher for my first Finance class.

Seriously enjoyed this class. I pay the most attention of all my classes and he really teaches hard material in an understandable way.

I'd recommend continuing with the typical "math professor" style of instruction, as many of the examples are very very clear and help students who don't understand the material as well visualize it.

Nothing needs to change, one of the fairest professors I've had.

Sometimes the class got a little slow and we would spend a really long time on one problem. Makes it hard to pay attention sometimes. But, overall really well taught.. The examples are super helpful.

Instructor is very knowledgeable about subject area. He is patient and really wants students to do well. He's clear when going over practice problems. I found the study guides to be very helpful in exam preparation.

N/A, this has been one of my favorite classes at Tulane!

N/A

Maybe have links on canvas to Youtube videos that break down how to use different financial calculators

Professor Sandvik provided an awesome classroom environment that facilitated tons of group work which was incredibly beneficial for this subject. He was relatively hands-off and would let us figure out the problems for ourselves and then show up quickly how to do them. He came in every day with amazing energy and this was my favorite class all semester. I enjoyed the speed, the applied knowledge, and how he prepared us for the exams.

I think Sandvick does an amazing job preparing his students for his tests and he teaches very effectively. Also his modules are easy to look back on and study for the tests. Additionally, the quizzes are really helpful in preparing as well.

Best professor ever.

None - professor sandvick is one of the best teachers I have had at Tulane.

Is a real teacher! Love this class

I wish class was a bit more exciting and interactive, but I understand why the class needed to be mainly lecture based.

This was not overly common, but sometimes the lectures were a little slow and there were a lot of slides to explain a simple concept, and other times a key concept would be covered quickly. I think narrowing down what kind of problems appear on exams and spending more time on those problems would be helpful.

You are really good teacher

very informative

An amazing professor just sometimes the lectures/powerpoints get a little confusing. I like it when he assigns us to do practice problems in our groups because it helps me practice the concepts as we learn them. I like how he also lets us do it on our own so we see where we get stuck.

None!

I enjoyed the hands-on practice problems every day and that he was open to answering any questions. I did feel that the presentations errored on the side of dense and too quick. Sometimes we spent half a class on more basic concepts just for the more advanced topics to be a bit rushed through. Altogether, he was very adaptive and flexible and I appreciated that.

Time allowed on tests

None, I love Sandvik's teaching style

Professor Sandvik is extremely passionate about the subject and I appreciate his enthusiasm every class. I enjoy his teaching style although it could be a bit slower on certain topics.

Professor Sandvik is a great instructor but could be a little more engaging. Additionally, the tests were a little more challenging than the class was taught.

Amazing professor. He was incredibly attentive and responsive when students needed additional help. Professor Sandvik made sure he always had office hours prior to exams and responded very quickly to emails. His lectures were very thorough and applicable. He was a very fair professor and I would highly recommend taking a course with him.

love the teaching approach

I feel like Professor Sandvik was a great professor. He knew the concepts well and was able to answer questions clearly, His test were fair and the one thing I felt needed to be changed was the length of tests. He listened to this request and our second midterm was shorter and easier to complete in the given time.

Nothing. You can't top perfection.

One of the best professors I have ever met!

Great teaching style! Very straightforward and always willing to help students if they did not understand.

I really like how Professor Sandvik teaches FINE3010. He explains all concepts and also practice problems very easy, so that everyone can understand the content. Quizzes are very helpful for recap and summarizing Information. Downside on that is, that critical questions and sophisticated problems are very rare. Despite that he is very engaged and motivated, answered to Email's very quickly and did not forget about follow up questions.

Very good

Comments of how the course met student's educational/professional expectations

Was practical and professional.

I have learned so much in this course and have a very good understand of Finance now

Great professor. He makes sure everyone is on the same page. Will go over the same question four times if people mindlessly ask the same question.- -he's patient.

I appreciate how you have lectured this semester and the content on your study guide. Your modules and lectures are easy to comprehend because of how you have presented the material.

Professor Sandvik is the best business school professor I've had during my three years at Tulane. He truly cares about his students' understanding of the course material and he makes classes extremely engaging. For these reasons and many more, Professor Sandvik's course and teaching abilities far exceeded my expectations, based on past experiences at Tulane.

The subject matter was very straightforward. Taught us what we needed to know and nothing more or nothing less.

This subject material is very closely linked to what I am going to do in my career so it was very important and interesting. Prof Sandvik does an exceptional job breaking things down to explain to us and making it easy to understand complex things.

The subject material had been made by Professor Sandvik for the specific needs of our class, and that was definitely clear. They were helpful and clearly linked to the textbook. Easy to follow in class as well as look at after class or to use as a resource for quizzes.

I loved how the class was structured. The practice problems and tests reviews were so helpful. I really feel like Professor Sandvik was teaching to help us remember financial skills for life, not just to memorize for a test and forget.

I believe Professor Sandvik's ability to show WHY we are learning the material, for example, his graph showing equity v bond v bills appreciation, helps to motivate his students to learn more about it and actually engage with the material.

I came in with no background in finance and I do not care about finance but everything he taught was made so interesting and I wish i needed to take another class with him.

This class met both my educational and professional expectations. I am leaving the class feeling like I know and understand all of the material.

Professor Sandvik was a fantastic teacher who was very organized, accessible to students, and clear in his teaching style. I learned a great deal from this course and would highly recommend him as a teacher.

I actually felt like I learned solid finance principles in this class. Professor Sandvik provided in-depth examples and was a very helpful teacher.

I got exactly what I was looking for in this class. I found the content to be helpful (bonds, perpetuities', interest rates, etc.)

Taught me a love for finance.

I thought I was going to really dislike this class because i am not super interested in Finance; however, Sandvick made it really enjoyable and I have started to feel more confident in my finance abilities.

It was awesome and so beneficial to do so much group work. It made me debate wanting to be a finance major, and to completely switch my track because the class was so engaging and interesting. He was super professional, friendly, and helpful all semester, and I wish I could take his class again next semester!

professor sandvick made learning this information manageable and challenging to the perfect extent. he is very willing to help everyone and clearly wants to the class to succeed.

I was happily surprised by how much I learned and enjoyed this class. I want to work in marketing, so this class was just a requirement I had to fill. However, Professor Sandvik allowed me to enjoy the material!

He makes finance so easy to learn. He makes an ultra complex subject into a fun class. 10/10 would recommend and take again. I am majoring in Finance because of how great his class was.

The material was what I expected from this class. I especially appreciated how Professor Sandvik incorporated and recommended relevant books that he personally found interesting in the lecture because there is so much to cover in this class, but for those of us who are interested we could go beyond the class a bit.

very interesting course

I feel that I learned a solid base of financial information.

The subject material exceeded my educational and professional expectations.

applicable in real world situations

I learned many basic finance terms and tactics, which I what I planned on learning

Everything we learned in the class was directly related to what practices are used in the finance industry. It felt like a class where you absolutely had to pay attention because the techniques and information we learned would be directly applied to our careers in Finance.

I feel that I have a better understanding of basic financial concepts

I felt like the subject material and the way the class was taught met my expectations of this course.

Going into a career in investment banking, Mr. Sandvik has done an exemplary job at preparing me to understand DCF analyses, as well as introducing the basic fundamentals of finance.

I did not know what the course would be like going in, but I enjoyed it a lot and truly feel I have a better understanding of the financial world.

As an exchange student I expected a harder class with more new content. Therefore I already knew most of the concepts. However that was my own mistake and has nothing to do with the class, surely that wasn't Professor Sandvik's fault at all. He even offered extra course work, which is a sign for flexibility and engagement. Really liked that!

The examples of problems helped with learning the material.

Very good

Comments on teaching materials, aids, and other resources used in course

I was a fan of the multi-monitor screens so that I didn't have to struggle to read the text

Best class I have taken, and teaching style is one of the best!

Great materials. I did not find myself needing the textbook because the powerpoints were more than adequate. I thought that was a good thing because textbooks are expensive.

The extra videos you offer on Canvas has helped me understand material I didn't understand while studying.

Professor Sandvik set clear expectations, prepared thorough powerpoints, and provided targeted practice problems to supplement our understanding of the course material. These efforts were effective in preparing his students for the exams.

The review packets were very helpful.

I love how we use all the screens in class and do practice problems. And it's also really helpful to see Prof. Sandvik write out problems on the whiteboard.

The weekly quizzes were extremely helpful. I also enjoyed the use of short videos to explain more complicated concepts. The Canvas page was extremely organized and made it very easy to find the resources needed.

I honestly think this class should be a guideline to how all general business requirements should be structured. I have taken all 3010s by now and this was the best learning experience by far. I have never thought of myself as a good finance student, but the way he structured the class allowed me to study effectively and succeed.

The study guides that Professor Sandvik gives his students are some of the most comprehensive study aids I've received at this university, and many professors could learn from Professor Sandvik's example.

amazing!

The professor provides students with all the materials necessary to succeed. Practice exams set realistic expectations for the actual exam and quizzes to give a weekly expectation of material to that date.

Love the study guides and how the tests are true to the guides. Lots of great practice in class too.

I really liked how he posted textbook problems solutions on Canvas. The pods were also nice in helping students get to know each other and help each other out during in-class exercises.

Professor Sandvik's combination of materials, resources, and aids is perfect for understanding the information taught in the class. He also really cares about his students and wants everyone to understand the material!

His lectures and slides were very clear and a helpful resource in the class.

The screens in the class are very useful

Gave great resources.

All of the teaching resources that Sandvick uses are extremely useful and purposeful. What I find to be the most helpful are the midterm reviews before the midterms. These set out exactly what kind of questions will be on the test while still making it challenging. I felt very motivated to learn in this class and I was surprised by my success!

We mostly did the powerpoint slide examples, but I loved preparing for midterm 1 via the crossword puzzle. That was really helpful. The practice midterms were also so helpful when studying, as well as the quizzes.

perfect

The review sheets for tests were very helpful. The powerpoints used in class were also filled with all of the information we needed to succeed.

Professor Sandvik's material, the practice tests and slides, are helpful, but the textbook is not. It has good practice problems, but the way it explains concepts is strange and a little confusing. This makes the quizzes a little tedious and not necessarily a test of the material because you have to read the language of the textbook very carefully, even if you think you understand the concept. I basically took every quiz with the book open and it felt more like a reading quiz. The practice problems were good though and that is what helped me most in this class.

good powerpoints and study guides for midterms

Professor Sandvick is great. Powerpoints with practice problems, problem sets, etc. were extremely helpful.

I really appreciated how clear and how detailly-outlined the assignments and overall course set up was. It was very accessible and resourceful. The amount of assignments and material was satisfactory. The quizzes werent daughting assignments or busy work, they were relevant and consise and extremely helpful in highlighting the important themes of each module. I also enjoyed that it was a perfect balance of concepts and practice problems. there was never an overload of either which made it easier to combine the language and math behind the subject.

Study guides very helpful, PowerPoint practice problems helpful too

I very much enjoyed the class, however it was difficult to keep track of all the topics and information. I would have like to have a centralized document or website with a chronological list of topics with a small summary of each topic and the important equations etc. of each section. It doesn't have to be exactly this but something like that would have been very useful.

The aids he gives online were a great help in understanding the material and doing well on the tests.

This man is the best Professor that I have had at Tulane so far

The teaching materials provided fit the class very well.

Resources were great, Quizzes and Slides are awesome. Textbook was not really needed.I really liked the fact, that there was no group work. I guess for student who learn with the slides would it be more convenient, if there would be a second deck of slides which only contains the complete slides. Then you don't need to click 5-6 times only to go to the one slide further.

Great class. Great use of examples.

Very good
