----------------------	---------------

- Professor Sandvik is amazing and I highly recommended him to my friends who still have to take FINE-3010. He made the material easy to understand and helped us be well-prepared for class and tests.
- I liked how straightforward this class was. There were never surprises and everything was outlined in the syllabus so I had ample time to plan and prepare for assignments. Professor Sandvik gave great study materials and fair exams. I also liked how routine and consistent the class was. I liked the style of watching the videos at home and synchronous lecture and practice. Overall, this course was enjoyable. My only concern is whether I am prepared for the rigor and content of advanced financial management.
- I believe that Professor Sandvik did an amazing job in teaching this financial management course.
- Great professor. Explicit lectures to help us solve the problem. My suggestion would be giving more questions for students to practice after class
- I really enjoyed Professor Sandvik's class and I wanted to write in here because I went into his class having absolutely no interest in finance, and I am now thinking of double majoring in it. I even subscribed to a finance newsletter to read in the morning which was definitely unexpected. Professor Sandvik made this class interesting for us, and his method of teaching worked very well for me. He posted pre-recorded lectures to watch before the in-person lecture, and this allowed me to go into class already knowing what we were going to talk about, and I was able to actually learn more. I told all of my friends to definitely take his class and I would continue to recommend to anyone!
- I thought this was a great class. The mix of the videos due before class and the lectures during class made a great combination for learning.
- This course was perfectly taught, planned, and tested. The tests were clear on what were expected, which is always great in a math-like class. The class sessions were perfectly paced and very informative. On top of that, the asynchronous videos were very helpful and a better alternative to zoom (if someone is sick). I am not too sure what I would recommend to change because it was a great class!
- I did not have any previous experience in finance, yet Professor Sandvik made the content understandable and manageable. I really appreciate the work we did this year.
- I love this guy!!!!!!
- one of best teachers ive had at tulane.
- Keep doing those prep videos, very helpful.
- Professor Sandvik made it easy for me, an exchange student, to understand the material providing us a lot of practice problems. In my opinion, the class would be better if it had done a deep dive into the material by covering the textbook more often.
- I really liked having both the videos to watch outside of class and the in-person lectures. The repetition allowed me to learn and process more of the course content.
- One of the best professors I've had at this school.
- Professor Sandvik is a great professor and breaks the course down very well.
- He explains the course material very well and makes sure everyone understands the material before moving on
- I don't think I've ever had a professor who explains his work as thoroughly and patiently as Professor Sandvik. He's super receptive to questions and clarifies them well. It's one of the only classes I can actually stay engaged in and the exam prep is super helpful as well. The only thing I don't like is the points system for grading, as it can tend to unintentionally pit students against each other, but that might be more of a problem with the 3.0 maximum class GPA than anything else.
- Overall, Professor Sandvik has been the best professor I have had at Tulane. I feel that Professor Sandvik does a fantastic job in effectively explaining/teaching the information each class so his students can understand it. Another aspect which I liked about the class is Professor Sandvik gave a lot of practice problems which I feel helped me learn and master the different materials and concepts.
- Would like to do more examples involving real companies.
- Professor Sandvik is one of the best teachers I've had at Tulane. He is extremely prepared for each class, and the structure of his lectures make it very easy to learn. He provides many resources to learn beyond the classroom and prepare for quizzes and exams. I wish every professor was like Prof. Sandvik, keep up the good work.
- I really liked this course and particularly, professor Sandvik. He explains very good and he applies to day-to-day situations
- I have loved my time in this course. I have thoroughly learned and found a passion for finance. The advice that Professor Sandvik gave about doing a lot of practice problems will help on exams was very wonderful. The exams and exam prep was very similar. That helped in preparing for exams and learning the material. Overall, Professor Sandvik is a great professor who took time to answer all of our questions about class and before an exam. Also, he breaks down a problem completely so that you can not only understand it but understand the math behind it.
- I think we could have had more graded assignments in general or in each week. For example, instead of weekly quizzes, maybe a problem set that we could take home that we could receive feedback on.
- Best class I have taken at Tulane. Sandvik is by far the best professor ever.
- Professor Sandvik is the best professor I have ever had. He really knows how to teach and really cares about his students.
- Good teacher, explained concepts well, not too much busy work
- I really enjoyed having to watch the videos before each class. Previewing material was very helpful to me. Thank you for such a great class.
- I enjoy this class and think it is taught in a productive and not stressful environment.
- Professor Sandvik has been hands down the best professor I have had at Tulane. The information we learned in this course was difficult, but he managed to teach it in a way that was interesting and easy to understand. By watching the videos before each class I felt very prepared and was able to sit and listen while also taking notes rather than just worrying about copying everything off the board. He made sure his students were always amply prepared for upcoming exams and assignments and was very personable and approaching when asking for extra help and questions. I really enjoyed my time in Professor Sandvik's course and wish he was teaching more finance courses for my future.
- everything on exams were covered in class
- I really found the recorded lectures that Professor Sandvik made helpful. It was great being able to be exposed to the material before class and then be able to get into examples during class.
- My favorite professor ever. I love you, Mr. Sandvik!
- Solid course, well taught. Very organized.
- Sandvik is a professor who cares. He takes questions throughout class sessions and answers them thoroughly.
- You are the teacher who impressed me the most. To be honest, many courses in the business school for me are only purely learning but I have not really invested in them. But the course of Fine made me truly feel the joy of learning a course with interest. This may be the reason why I am interested in fine, but it is also inseparable from the excellent teaching taught by you. This is why most of the classes I want to ask you questions after class. The only thing that makes me feel pity is that due to language factors (my personal English is not enough to allow me to fully explore some business issues that I am really interested in) I can't find you to deeply discuss some business topics. (For example, how did the United States achieve negative bank interest rates, etc.) But this is indeed a course that makes me very happy. Thank you very much for your teaching. Have a nice winter vacation! And I wanna ask do you teach other fine classes□
- Very good and knowledgeable professor

---

- Mr. Jason is a very good teacher. He uses so many materials that is useful for us to understand the content. He have so many videos aviliable for us to review before and after class. It give people oppotunity to preview and review. I think other teacher should do the same things.
- Professor Jason Sandvik has done an amazing job preparing his students for the course material, always very throughout and makes sure they are prepared for the exams
- im bad at math and not doing well in the class, but can definitely say this is the first finance class that makes sense and is taught very well. my bad for not doing well because the hurricane messed up my routine.
- Jason Sandvik is the goat.
- Great professor!!!!
- Really appreciated this class. Also, I liked the grading scheme.
- Course should have had more opportunities for credit.
- Jason Sandvik is hands down the best professor I have taken at Tulane. He is excited about the material as well as helping his students. His class is very clear and he explains the material very well. I thought I would hate finance, but his is a class I look forward to attending.
- Professor Sandvik is very helpful and makes videos about what we are learning so it is helpful to go back and rewatch.
- This was a great course considering that everything including the professor, work material, study material, and notes were great resources that helped me learn and grow in this class.
- Great course, professor does a great job at explaining everything in much detail.
- Very organized course and well taught course, only problem is that tests are too easy and predictable, making it so that with the 3.0 GPA curve you have to be basically perfect to get an A. If tests were more challenging, the course would curve itself more naturally.
- Great course and very fair to all the people in the class. Overall great class experience.
- It was the best subject I had this semester
- Dr. Sandvik is an excellent instructor who is obviously knowledgeable about the subject and teaches his lessons in a way that makes them easy to comprehend. Dr. Sandvik makes FINE 3010 enjoyable and I now have a greater understanding and interest in finance. I liked the way he structured the course by having supplemental videos available to watch before each class which helped me enter each day prepared for the lesson.
- This was a good class, but at times I felt Professor Sandvik went a little slow. I'm sure some people may have benefited from the monotony, but sometimes it felt elementary.
- Professor Sandvik was extremely helpful and I really liked his teaching style and he always made sure that the classes were interesting. You could tell he is very passionate about teaching.
- Professor Jason Sandvik explained the course material very thoroughly and in a way that was easy to understand and interesting. He also made the students very well prepared for the exams by reviewing the material and giving lots of extra study material to practice on that was very applicable towards the exam. I would highly recommend Professor Jason Sandvik to anyone taking this course.
- I thoroughly enjoyed this class. The professor, Dr. Sandvik, was extremely helpful and a great teacher and explainer. From the pre-recorded videos to in-class lectures, I learned a lot about the intermediate financing for companies. I am also very thankful for having this professor.
